

FP&A Tech Practice

Independent Consulting, Tool Selection & Implementation

Professional planning and forecasting are essential today—but tools alone are not enough. torq.partners provides manufacturer-independent support from analysis to implementation.

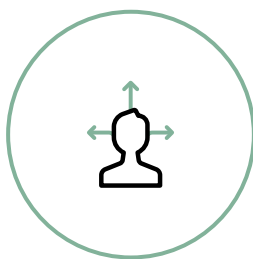

Our Approach

Practical end-to-end approach: The right solution for every use case—from early start-ups to complex mid-cap companies.

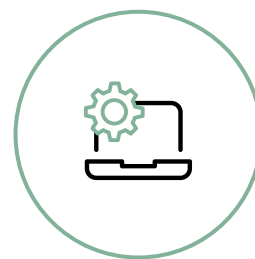

Consult

Deep understanding of business model, steering logic, and current maturity level

Decide

Structured, independent tool selection matching your use case

Implement

Functional, technical, and organizational implementation up to Go-Live

We work in partnership with all relevant FP&A providers:

••• Abacum

p planful

PIGMENT

datarails

What specifically improves

- Clearly defined **steering logic** with unambiguous **KPIs** and responsibilities
- **Uniform view of figures** for management, finance, and investors
- Separation of operational control, forecasting, and external reporting
- **Transparent assumptions and drivers** instead of black-box models
- **FP&A setup that scales** with the company

Typical Entry Points

- **Review** of existing FP&A structures and tools
- **Sparring** on tool selection or second opinion
- Accompanied **implementation** including functional setup
- **Further development** of existing planning and reporting logics
- Entry usually as a **compact review** or a clearly **defined project**
